ABOUT COMPANY

Green IT Hub

positions itself as a global, eco-conscious hosting provider, delivering a full range of services from basic shared hosting to specialized Odoo hosting. With transparent pricing, strong performance, and around-the-clock customer support, their solutions are well-suited to small businesses, agencies, and enterprises seeking reliable web infrastructure.

Green IT Hub is a technology and hosting services provider with a global reach. We offer a robust suite of hosting solutions spanning **shared hosting, VPS, reseller plans, dedicated servers, WordPress hosting, and Odoo hosting** engineered to deliver reliable and secure digital infrastructure.

Mission:

At Green IT Hub, our mission is to empower individuals and businesses worldwide with reliable, high-performance, and secure hosting solutions while placing sustainability at the core of our operations.

Vision:

We envision a digital world where eco-conscious technology meets top-tier infrastructure, enabling websites and online ventures to thrive without compromising on environmental responsibility.

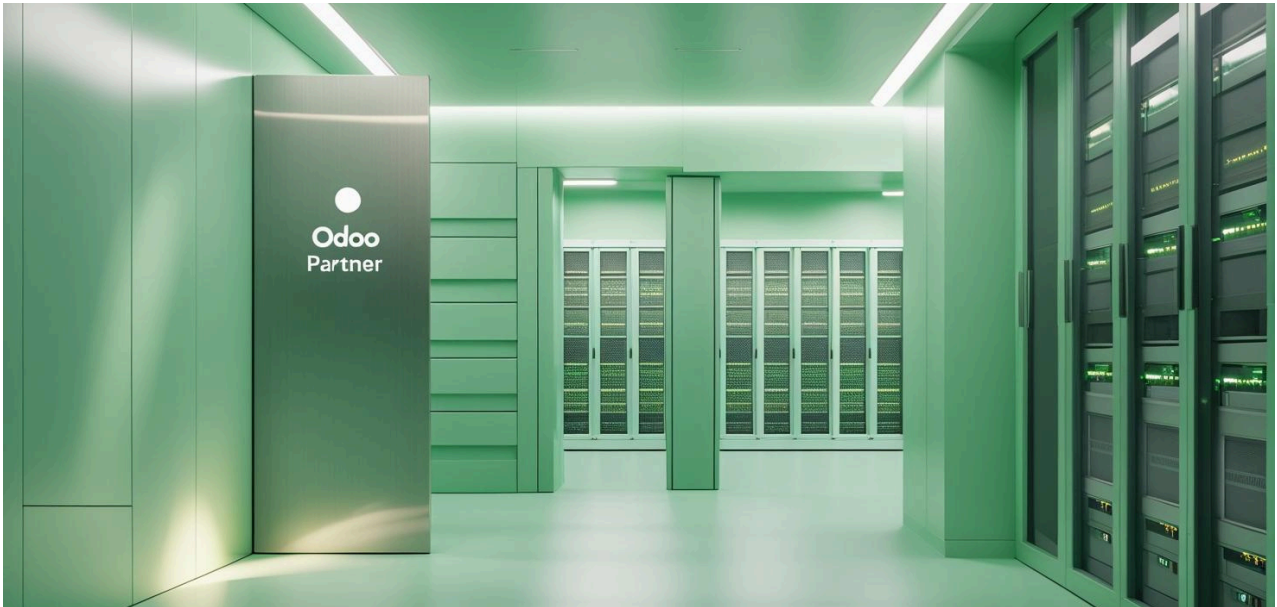

ABOUT CEO

The CEO of **Green IT Hub** is a visionary cybersecurity strategist with expertise in ethical hacking, penetration testing, and vulnerability assessment. Backed by industry certifications in Cybersecurity, Linux, Networking, and Odoo, he blends deep technical knowledge with business acumen. Under his leadership, Green IT Hub has become a trusted provider of affordable, comprehensive digital security solutions. His proactive approach featuring real-time risk detection, social engineering testing, and post-breach response ensures resilient IT infrastructures. Committed to transparency and client education, he drives initiatives that prioritize strategic automation and cost-effective protection for businesses of all sizes.

- Social Engineering Testing

HOSTING SERVICES

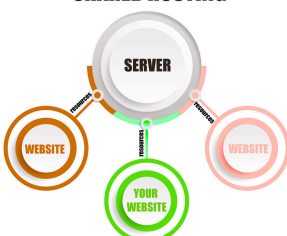

At Green IT Hub, we provide a full spectrum of web hosting solutions tailored to meet the needs of individuals, businesses, developers, and digital agencies. Our services are designed for performance, reliability, and scalability backed by modern infrastructure and a commitment to green IT practices.

- **Shared Hosting:** Ideal for startups and small websites; includes SSD storage, unmetered bandwidth, and unlimited email accounts.
- **VPS Hosting:** Designed for growing projects; offers dedicated IPs, scalable SSDs, and virtual CPU cores.
- **Reseller Hosting:** Best for agencies and professionals; features generous SSD space, WHMCS integration, and automatic backups.

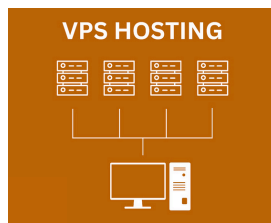

Whether you're running a WordPress site, managing an ERP system, or need full server control, we've got you covered.

- **WordPress Hosting:** Optimized for speed and performance, our WordPress plans come with enhanced CPU resources to keep your site running smoothly.
- **Dedicated Servers:** For resource-intensive projects, our high-spec dedicated servers offer complete control and top-tier performance.
- **Odoo Hosting:** Designed for ERP users, this solution includes dedicated database instances, built-in SMTP, SSL support, and a fully managed environment.
